

8 STEPS TO PREVENT GLUTEN CROSS CONTAMINATION

- 1)** Remove all excess wet or dry (or both) debris from the area of concern with paper towels / brooms / dustpans / scrapers and any other cleaning equipment available.
- 2)** Place excess debris in garbage prior to applying water to any surfaces.
- 3)** Spray water to the surfaces to be cleaned, rinsing from top to bottom until all soils are removed.
- 4)** Spray "Enforce LP (foaming / degreaser) solution to the area / surface to be cleaned.
- 5)** Use scrubbing pads when removing heavy soils.
- 6)** Rinse Enforce LP solution off with water thoroughly.
- 7)** Apply a coat of sanitizer; "Whisper 400" and allow to air dry.
- 8)** Squeegee any water or chemical that is on the floor after cleaning.

Product Suggestions as noted above:

Two types of Ecolab products

- Enforce LP, foaming and degreasing agent
- Whisper 400 sanitizer.
